

Rösler Service

# Repairs for components of mass finishing and shot blast systems

As the market leader in surface technology, we offer you a wide range of services. This includes a comprehensive repair service for components of mass finishing and shot blast systems

(e.g., circular and trough vibrators, centrifugal and through-feed systems, and turbine and pressure blast systems).

- ▶ Drive and bearing assemblies for high energy disk machines
- ▶ Rotor bearing units
- ▶ Centrifuges
- ▶ Process water system components
- ▶ Blast turbines
- ▶ Blast nozzle assemblies
- ▶ Wet and dry dust collectors
- ▶ Work piece fixtures

## Additional services

In order to minimize downtime for repairs, we offer a rental service for individual components. Please contact us for more information about this.
